

# Kansas Nursing Homes with Three Years of Poor Inspection Trends

Each year Kansas Advocates for Better Care (KABC) provides citizens a listing of Kansas nursing homes cited with 10 or more deficiencies for each of the home's three most recent inspections. The national average of deficiencies cited during an inspection in a nursing home is 8, and in Kansas the average is 12.

The number of deficiencies cited by the Kansas Department on Aging during the most recent inspection survey period are listed below by nursing facility. 0 to 53 is the range of deficiencies cited in Kansas nursing homes for the most recent inspection period. For three consecutive years the 77 Kansas nursing homes (listed below) have exceeded the national average of deficiencies cited. 15 of the homes listed are not-for-profit corporations, 62 are for-profit corporations. Nursing Homes marked with an asterisk (\*\*) are Special Focus Facilities (SFF) which have been singled out for penalties and greater oversight due to poor performance. In addition, those facilities in bold have been cited for actual harm, immediate jeopardy, and/or deficiencies classified by CMS as "mistreatment" of residents during their most recent inspection survey.<sup>1</sup>

There has been a slow upward climb in the Kansas deficiency average in recent years. The average length of time between surveys at each nursing home has grown from 12 to 15 months over the past three years. By federal mandate, inspection surveys occur every 15 months in Kansas nursing homes. Nursing home inspections are mandated by federal law to ensure that frail elders and vulnerable adults who live in nursing homes are provided care according to standards set by state and federal regulations. Inspection teams are made up of nurses employed by the Kansas Department on Aging. There are currently 339 licensed nursing homes in Kansas.

Kansas Advocates for Better Care (KABC) encourages consumers to look at a number of factors when evaluating a nursing home as a place to live and receive care. Annual survey results are one of those factors. If you have questions, please call KABC toll-free: 800-525-1782. KABC is a 501 c 3 non-profit. Our mission since 1975 is "Advocating for Quality Long-Term Care" for frail and elderly residents of nursing homes and other licensed care facilities. For 35 years KABC has served Kansas citizens by:

- Advocating on behalf of consumers for increased quality in long-term care options that include nursing homes, assisted living, home plus, and in-home care provided through home and community-based services (HCBS).
- Providing guidance, education and advocacy for consumers/citizens seeking long-term care placement and services,
- Providing education to long-term care providers, and
- Encouraging long-term care providers to adopt the "person-centered care" model of delivering health care services.

KABC supports legislation that would increase the minimum nursing staffing hours in Kansas nursing homes from 2 hours per resident per day to 4 hours per resident per day. Research indicates that adequate nursing care is a significant indicator for improving quality of life and care for elders in nursing homes. If you, your family or a friend is in need of information about long-term care choices, please call for assistance, toll-free (outside of Lawrence): 800-525-1782, or 842-3088 (in Lawrence), email us at [info@kabc.org](mailto:info@kabc.org) or visit [www.kabc.org](http://www.kabc.org)
